### **DETAILED ACTION**

This is the first office action in response to the above identified patent application filed on 02/09/2004.

#### ***Claim Objections***

1. Claim 24 objected to because of the following informalities:

Claim 24 recites "A nozzle according to claim wherein..." in line 1. It is unclear to claim is this recitation referring back to. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Martens (US 2002/0178711).

Martens (particularly figures 1-4) teaches a gas turbine engine comprising: a core engine exhaust nozzle, a fan exhaust nozzle and a center plug, wherein both nozzles have chevrons extending from an aft end of said exhaust nozzles, said chevrons having a radially inner surface and outer surface bounded by a laterally sinuous trailing edge, said chevrons having a sinusoidal shape.
